GRIPeL course leader: Neil

Known in short as Neil, Nilakanta helps organizations deliver superior customer experience, transform businesses & execute business strategy.

Neil has served in various leadership capacities in organizations like **HSBC, Bank of America, Whirlpool Corporation, Standard Chartered Bank & TVS Motors**. During his tenure, he has led a wide variety of enterprise-level change deployment programs in manufacturing & service environments.

His last assignment was with **HSBC as Senior Vice President for Customer Experience & Business Transformation**. Prior to this, he led Quality & Productivity Unit for Bank of America-India. In both these roles, as enterprise deployment leader, he managed a large team of experts & senior resources with varied experience & background. He has helped organizations in Strategic Business Planning using Hoshin Kanri.

As **Head – Service Excellence Trg in Standard Chartered Scope**, Neil designed, developed & conducted several workshops for CXOs & Senior Management in customer experience, business excellence & six sigma across Asia, US & Europe. Originally trained as an industrial engineer, Neil holds M.S(Manufacturing Management), BTech(Production Technology) and BSc(Physics). He has led large scale initiatives & projects in operations management in manufacturing & design environments when employed in Whirlpool & TVS.

Being a **Certified Six Sigma Master Black Belt**, Neil has led several change initiatives & projects with approved financial benefits of over \$20MN, of which \$4Mn was executed by him personally. He has demonstrated results in unconventional areas such as sales, HR, technology, risk & compliance, program office, administration & security, procurement, etc.

Neil's approach is not to prescribe any 'methodology'. Instead he uses his experience with **Hoshin Kanri, Balance Scorecard, LEAN, TQM, Six Sigma, Triz, Theory of Constraints, Knowledge Management, industrial engineering methods, ISO, PCMM, etc** to deliver a composite solution that will resolve the pain points and improve profitability, productivity & process. He has also personally coached & certified several professionals in six sigma, lean and metrics management in the past. Due to his diverse background, he is culturally sensitized and freely mingles with all levels in any organization. He is passionate about enhancing Customer Experience & One-on-One Coaching!

Areas of Specialty:

Benchmarking, VOC, Research, Complaint Management, Operations Management, Strategic Planning, Performance Management, Process Optimization, Process Planning, Six Sigma, Lean, Hoshin Kanri, TQM, Industrial Engineering Techniques, BPR, Business Transformation, Balanced Scorecard, Triz, Process Management, Automation & Robotics, Innovation, BPM, TPS, JIT Kaizen, Re-engineering, Product Development, DFSS, Business Excellence, Customer Service, Transition, Project Management, training etc. Neil is a certified Six Sigma Master Black Belt. Blue Ocean Strategy Masterclass

Companies have long engaged in head-to-head competition in search of sustained, profitable growth. They have fought for competitive advantage, battled over market share, and struggled for differentiation.

Yet in today's overcrowded industries, competing head-on results in nothing but a bloody "red ocean" of rivals fighting over a shrinking profit pool. In a book that challenges everything you thought you knew about the requirements for strategic success, W. Chan Kim and Renée Mauborgne contend that while most companies compete within such red oceans, this strategy is increasingly unlikely to create profitable growth in the future.

Based on a study of 150 strategic moves spanning more than a hundred years and thirty industries, Kim and Mauborgne argue that tomorrow's leading companies will succeed not by battling competitors, but by creating "blue oceans" of uncontested market space ripe for growth. Such strategic moves—termed "value innovation"—create powerful leaps in value for both the firm and its buyers, rendering rivals obsolete and unleashing new demand.

Blue Ocean Strategy provides a systematic approach to making the competition irrelevant. In this frame-changing book, Kim and Mauborgne present a proven analytical framework and the tools for successfully creating and capturing blue oceans. Examining a wide range of strategic moves across a host of industries, Blue Ocean Strategy highlights the six principles that every company can use to successfully formulate and execute blue ocean strategies. The six principles show how to reconstruct market boundaries, focus on the big picture, reach beyond existing demand, get the strategic sequence right, overcome organizational hurdles, and build execution into strategy.

What blue ocean strategy seeks to do is to make the creation and capturing of blue oceans as systematic and actionable as competing in the red waters of known market space. For although blue ocean strategists have always existed, for the most part their strategies have been largely unconscious. Blue ocean strategy seeks to remedy this by not only decoding the pattern and principles behind the successful creation of blue oceans, but also providing the analytical frameworks and tools to act on this insight.

Upending traditional thinking about strategy, Blue Ocean Strategy charts a bold new path to winning the future.
