Brief Description

Python Developer with 3 years of experience in designing and delivering scalable applications across backend systems, data analytics, automation, and desktop interfaces. Experienced in building robust APIs, data-driven dashboards, image-based solutions, and distributed services using well-structured architectural patterns. Strong background in workflow design, test automation, and database-backed applications, with a focus on clean architecture, performance optimization, and maintainable code. **Immediate joiner; open to remote, hybrid, or on-site roles at any location.**

Technical Skills

- **Languages:** Python, Java, C/C++, JavaScript
- **Backend & APIs:** FastAPI, Django, CherryPy, RESTful APIs, Redis, Celery
- **Databases and ORM:** MySQL, SQLAlchemy and Peewee
- **Testing & Design:** Pytest, Selenium, MVC, POM, FSM, Singleton
- **Data & Image Processing:** Pandas, NumPy, Plotly, OpenCV
- **DevOps & Cloud:** Docker, Kubernetes (CronJobs), GCP, Jenkins, Grafana
- **Tools & Platforms:** Git, Linux, PyCharm, MySQL Workbench, Draw.io

Work experience

Programmer Analyst, Backend Team Lead | **Dosepack LLP** | **Ahmedabad** | www.dosepacker.com
Oct-2022 to Jan-2026

Back-end Micro services

- Improved the efficiency of System Analytics server APIs by **94%**.
- Architected a **flexible web application structure** that scales cleanly for new pages of web-portal.
- Refactored code for **cross-hardware compatibility** through multiple development iterations.
- Implemented multi-server backend pipeline for **detection of faulty pill drop sensor**.

Data Analytics and Visualization

- Designed backend APIs and alerting pipelines to **diagnose delivery cycle bottlenecks** using statistical analysis.
- Engineered dashboards for **real-time analysis** of pack processing workflow latency, error events, and pill-drop sensor data across testing and production modes.

Image Processing

- Improved efficiency of API which verifies proper placement of page on pack in by **20%**.
- **Diagnosis of Raspberry Pi** of Vision system by developing a micro-service.
- Addressed minor vision system issues in cloud archiving and lighting robustness.

Education

Bachelor of Technology (B. Tech) in Information and Communication Technology

Pandit Deendayal Energy University, Gandhinagar – 2022

CPI: 9.74

Higher Secondary (Class XII), ISC — 2017

Percentage: **96%**
