

DEVELOPMENT FRAMEWORK: WWW.JIMMYGO.COM

1. **The purpose and operating of the platform:** To provide a communications system for business owners to inform end-users of sales, discounts, special offers and events by direct notification or lookup. The platform is a marketing and communications tool and generates an income through the sales of subscriptions to advertisers. Sales will be done through a combination of representatives and directly via the platform.

2. **System specifications:** The communications system must incorporate the following:

Scale of use and system requirements overview:

- 2.1 Initially operate in South Africa but must be scalable to allow operations in other countries in the rest of Africa and beyond where other languages are used.
- 2.2 The system must from the start be developed to function on all the mobile operating systems, including Symbian (Nokia) – changing to Windows Phone - and Blackberry which are very popular in South Africa. Desktop operation on personal computers is of secondary importance.
- 2.3 User-friendliness, attractive graphical design and ease of use are crucially important.
- 2.4 Social media must be incorporated wherever possible, e.g. login via a Facebook account.
- 2.5 Hosting of the platform must be provided at competitive costs and allow 100% availability and immediate execution of tasks performed.
- 2.6 Sufficient bandwidth must be provided at all times and be upgradeable at competitive costs as the platform's users increase.
- 2.7 The latest mobile technology must be used to make it as easy and attractive as is possible for end-users to be placed on the database and use the platform's functionality. The following should be used wherever it is practically possible:
 - 2.7.1 GPS to determine location.
 - 2.7.2 Near Field Communication (NFC).
 - 2.7.3 QR (Quick response) codes.
 - 2.7.4 An Application or "App" to facilitate the marketing process to both end-users and businesses. The "App" must be able to operate on all mobile platforms. See also 2.12 - 2.13 and 2.25 below.

End-users:

- 2.8 Make provision for the creation of a large database of end-users (consumers, members of the public). End-users can join the database via the following channels:
 - 2.8.1 Directly on www.jimmygo.com
 - 2.8.2 Via the “sub site” of a business on www.jimmygo.com (see 2.21 below). End-users who join via sub sites must be linked to the sub site and placed on the bigger database.
 - 2.8.3 Via an “Application” which must be made available for all mobile operating systems.
 - 2.8.4 Via (To be confirmed in confidence later).
- 2.9 Filtering must be done by certain criteria when end-users join the database including geographical location and interests in order to provide both end-users and advertisers with relevant data.
- 2.10 End-users must have a unique Password (linked to their Facebook login) and receive a copy of these on joining..
- 2.11 End-users must have a secure login point where they will be granted access to their records, via their Facebook account, on the database and edit their data
- 2.12 The “App” must enable end-users to be placed on the Jimmygo database according to certain filters.
- 2.13 The “App” must be able to keep end-users informed of any new special offers, promotions and events which have been uploaded and are available according to their filtering criteria.
- 2.14 There must be a “Help” function to assist users who encounter problems.
- 2.15 End-users must have a search function to lookup sales, promotions, special offers and events according to certain filters.
- 2.16 A weekly newsletter of future promotions must be compiled by the system and distributed to end-users according to certain filters and criteria.
- 2.17 Notifications must be personalised to include the recipient’s name, and a picture?

Businesses:

- 2.18 Advertisers must be able to activate their accounts directly and create their own sub site.
- 2.19 A separate and secure login/access point must be provided for businesses, enabling them to update their data and access their events and promotions functions.
- 2.20 Business owners must have the functionality to upload and distribute their promotions and events by themselves.
- 2.21 Interfaces must be created in order to link with other databases: Businesses must have their own sub sites where they have the functionality to build their own database and also build on the bigger database.
- 2.22 Business owners must have the option to communicate directly either with their own database or with the bigger database according to certain geographical and other filters.

- 2.23 Business sub sites must provide two databases namely for (1) end-users and (2) suppliers/business contacts. It must be possible to communicate with both either separately or simultaneously.
- 2.24 There must be a “Help” function to assist users who encounter problems.
- 2.25 The “App” must grant business owners secure access to the website in order to edit their data, upload and distribute their promotions and events.
- 2.26 Advertisers must be reminded to update their advertisements and events

Jimmygo management: The management of Jimmygo.com must have the following functionality:

- 2.26 Activate and de-activate the records of new advertisers.
- 2.27 Upload and distribute promotions and events on behalf of businesses.
- 2.28 Compile reports to evaluate the performance of sales representatives.
- 2.29 View the end-users who have joined according to certain filters.
- 2.30 Upload welcome letter to new advertisers and end-users and send these on joining.
- 2.31 Register and grant secure access to management personnel.
- 2.32 Upload and edit “Welcome”, “Why Join”, “About us”, “Contact us” and Home pages.
- 2.33 View and edit the records of businesses according to certain filters.
- 2.34 Send a message to groups of end-users according to certain filters.
- 2.35 Keep records of the dates when businesses joined, renewal dates, payment date(s) and amount(s) paid. Provide a report regarding renewal dates for management to follow up on.
- 2.36 Create an invoice and a receipt based on the business’ data. Link this to the businesses which activate their accounts directly without a sales representative.
- 2.37 Create a sub site for businesses.
- 2.38 Management personnel must have their own @jimmygo.com email address.
- 2.39 A link is needed which can be used by sales representatives to complete the details of an advertiser and send to the administration office for activation of the advertiser’s account.

General requirements:

- 2.40 Visitors to Jimmygo.com must be able to contact the office of Jimmygo by Skype, email, join their Facebook page, and download the “App” from a link on the Homepage.
- 2.41 A Business Directory which displays the categories of business classification groups is needed. This must be linked to the business’ records on the database.
- 2.42 A digital map is needed which allows users to easily identify and navigate to the locations of advertisers.

3. Process overview:

 - + Day(s) open and opening times.
 - + Contact person.
 - + Contact detail: Website, email address, tel. nr., mobile phone, Fax, Skype id., GPS co-ordinates.
 - + Map and directions.
 - + Logo/Banner and 8 images.
 - + Video.
 - + Youtube, Facebook, Twitter links.
 - + Layout of the market showing the place of each stall.
 - + Function to register end-users and communicate with them.

- * The “Stalls” must have the following information:
 - + Name of the stall.
 - + Contact person.
 - + Contact detail: Website, email, tel. nr., mobile phone, fax., Skype address.
 - + Overview of activities and products provided.
 - + Logo/Banner and 8 images.
 - + Video of products.
 - + Pricelist.
 - + Youtube, Facebook, Twitter links.
 - + Order form to place orders.
 - + Function to register customers and keep in contact with them.
- * Start date.
- * End date.
- * Start time.
- * Details and description.
- * Entrance fees/Ticket costs.
- * Images of event System to resize images for optimal display.
- * Video linked to event.
- * Link to Youtube channel.
- * Upload multiple documents (Word/PDF/JPEG and other formats) for to upload a brochure.
- * Feed to Twitter, Facebook, Whatsnew, Mixit, ?
- * Options to distribute the event:
 - Immediately to end-users or
 - Place on Newsletter.
 - Geographical distribution: Specify filters to be Applied:
 - Own database only or
 - Own suppliers only or
 - Jimmygo shared database.
- * Event Active/Not.
- * Help function.
- * Weekends and public holidays must be indicated.

8. **Input: Newsletters/(Future Promotions?):** Fields to be completed:

- * Link to advertiser.
- * Title of promotion.
- * Start date of promotion.
- * End date of promotion.
- * Category(s) of product.
- * Description of promotion.
- * Images of product(s) System to resize images for optimal display.
- * Video linked to promotion.
- * Link to Youtube channel.
- * Upload multiple documents (Word/PDF/JPEG and other formats) for use by e.g. supermarkets to upload a brochure.

- * Geographical distribution: Specify filters to be applied.
- * Help function.

9. **Input: Welcome pages:** Fields to be completed:

- * About us.
- * Why join.
- * Terms and conditions.
- * Welcome message on Home Page.
- * Welcome message to new end-users.
- * Welcome message to advertisers.
- * Contact us.

10. **Input: Home Page:** Fields to be completed:

- * Display on Home Page.
- * Message(s) on Home Page.
- * Terms and conditions (Click to confirm agreement).
- * Login function (“Jimmygo Login”) for end-users, advertisers, management.
- * Separate end-user and business users Login?
