

Reliability Centered Maintenance

Maximizing the reliability, availability and maintainability at plants by leveraging best operations processes

12th & 13th October 2012

Mumbai, India

Book & Pay per Delegate:

INR 29950 Net + 12.36% service tax

*3 or more delegates 10% discount. Investment is per person for 2 days non residential conference. Payments have to be processed in 5 working days from booking. TDS/ Taxes needs to be added on the Net amount as above.

Investment for International clients is **USD 750 Net + 12.36 % Service Tax**

Key Sessions:

Day 1 Sessions:

Session One: Introduction
Session Two: Functions & Performance Standards
Session Three: FMEA
Session Four: Failure consequences
Session Five: Proactive Maintenance
Session Six: Preventive Maintenance
Session Seven: Predictive Maintenance

Day 2 Sessions:

Session One: Failure Findings
Session Two: RCM Decision diagram
Session Three: Implementation of RCM
Session Four: Actuarial Analysis and failure data
Session Five: Expected achievements
Session Six: Case Studies
Session Seven: Condition Monitoring tools

Benefits of attending:

- **Gaining** practical insights on RCM
- **Exploring** RCM models & tools
- **Attracting** & developing 21st century maintenance Managers
- **Planning** recovery from failure
- **Maximising** awareness in plants
- **Preparing** robust failure prevention plans

Online Pre Course Questionnaire:

Training sessions will be tailored by the **Pre Course Questionnaire** which will be provided to the delegates post registrations & by receiving the inputs from delegates the same will be forwarded to speakers for customization.

Who should attend?

All plant, Reliability, Maintenance, Mechanical, Production, Engineering, Operations, Technical Management, Integrity Management and Drilling of all major sectors from Manufacturing, Oil and gas, Petrochemicals and chemicals, Utilities companies, Heavy industries, Steel and aluminium

"A properly implemented and managed **RCM** program can save millions in unscheduled maintenance and breakdowns"

GRIPeL course leader

Prashant Srivastava

B. Tech & PGDM

3 Decades of professional Experience

Imparting trainings since last 10 years

Delivered 30+ high end courses

Adopted best practices from North America, Western Europe, Far East, South East Asia and Middle East

Prashant Srivastava is a Graduate Electrical Engineer from **Indian Institute of Technology, Kanpur** and an **MBA from AIMA**, New Delhi. During his career spanning over **thirty years**, he has experienced industry in many capacities and in many sectors.

Starting his career in Larsen & Toubro, Bombay, where he learned Switchgear Design, he has worked in Usha Martin Black, Lohia Machines and , SAMTEL in Projects, Maintenance and General Management, at senior positions.

Since last ten years, he is imparting training to professional engineers and providing consultancy.

He has designed and manufactured over 50 machines for Steel, Food, Automobile, White Goods, Electronics, Chemical and various other industries.

He has undertaken more than **thirty training courses on Electrical Engineering and Mechatronix.**

He has a regular customer in **NTPC, Toyota Motors, HINDALCO** and many other reputed companies, and has conducted several training programs (Open Workshops and In House) on Electrical Engineering topics.

He has also provided training to several companies in Middle East. He has also conducted several workshops on improving energy efficiency and reducing Carbon Di Oxide Emission from Fuel fired furnaces with UNDP under Ministry of Steel.

He has travelled extensively abroad and has visited most of North America, Western Europe, Far East, South East Asia and Middle East in professional capacity.
